

## **AVAILABLE RESOURCES:**

Include in this section all the resources and means that the Sponsoring Institution commits, human and material, for the adequate development of the Research and the fulfillment of its objectives. Indicate how the available resources will complement those requested in this proposal. (**use letter size format, Verdana font size 10 or similar**)

The project will be housed in the infrastructure of the Biomedical Imaging Center (CIB), which depends on the Institute of Biological and Medical Engineering, the Department of Electrical Engineering and the Department of Radiology of the Pontifical Catholic University of Chile.

Among the equipment to be used for the development of the investigation are:

- Access to two Philips Achieva 1.5T and Philips Ingenia 3.0T magnetic resonators for research.

Additionally, the CIB has the necessary human resources for the experiments that are carried out in the project, including a Medical Technologist who will be in charge of the acquisition of the images of the volunteers.
